DURALLOY® GP 12

Duralloy GP 12 is a General Purpose Rutlie type electrode with all positional capabilities.

It has a very smooth stable arc and is ideal for use with the Duralloy manual arc machine range.

Duralloy GP 12 is ideal for the novice and the professional welder. Its low fume and spatter levels along with the excellent striking and restriking capabilities makes the electrode extremely user-friendly. GP 12 has excellent arc penetration and the fast freezing slag allows this electrode to be used in all positions.
